

RESCUE

Texas Rescue

Daphne turned up on Craig's List. One of our prior adopters saw her and called about her and helped us get her into our rescue. This wonderful woman adopted Daphne. This will be Daphne's last stop and forever home. Thank you to her forever mom for taking care of her. She now resides in McKinney, TX.

GW is one of two beautiful brothers that just needed a less crowded place to call home. He was adopted out with his brother in the North Texas area.

Magic is a very beautiful boy. His mom thought that since he was in a large pack of dogs and the fact that he is a very dominate male, it would be best for him to go to a home with no other animals. He is currently up for adoption.

Cody - A lovely youngster that came into rescue several months ago. His fosters realized that something was not quite right. A trip to the vet revealed a blood disease so he could not be neutered until his blood counts were normal. With months of steroid therapy, his weight and coat suffered but his health slowly improved. Unsure of what the future holds for Cody his foster decided to keep him and adopt him and recently neutered him.

Shooter - One of two beautiful brothers that just needed a less crowded place to call home. He was adopted out with his brother in the North Texas area.

Vinnie was taken out of the backyard of a standard poodle breeder. He is a young 17 month old boy. Thank goodness the only designer litter he produced was very small. We were very fortunate to rescue him before any further irresponsible breeding was done. He is now a happy neutered boy living in the Texarkana, TX area.

Andy is a 17 month old baby. His owners thought that their 2 year old daughter was allergic, so in March they decided to surrender him to TXOESR. They changed their minds on two occasions and then took Andy to a high kill shelter. We were notified and immediately drove to get him.

Taffy is an older gal around the age of 8. Her family felt that it was best to rehome her due to a financial situation. She has found her forever home with her foster family in the Austin area.

Charlie, a year old boy was picked up by animal control in El Paso, TX after escaping from his yard. His owner knew that the shelter had him but did not want to be bothered with him so she chose not to claim him. We got him out of the shelter and adopted him to a wonderful family. After all the vetting Charlie was HW positive but the family still wanted to adopt him to make sure his treatment was given to him. Their young child and Charlie have bonded and he is recovering nicely in his new forever and LOVING home in the El Paso area.

New York Rescue

Hannah is a 3 yr old spayed female. She was turned over to me by her owner who lost her job and was relocating. She is a very friendly and playful OES who loves life. She is now in a former OES household.

Lady came to our rescue after her daddy passed away. Her mom felt that she could no longer take care of her like she deserved and wanted her to have the best possible life. Lady is a wonderful gentle soul and is ready for her forever home in the Austin, TX area.

Bucee was a three year old owner turn in. The family failed to watch their 12 month old son that had toddled to Bucee's food bowl. The child startled him and Bucee reacted. They felt it would be best to re-home him. Bucee a fun loving and gentle boy is now living with his new forever family in the Ft Worth, TX area.

Oliver is a year old neutered male. He owner was ill so she was down sizing her dogs at home. She also did Collie Rescue and had Collies to be placed. Ollie is very sweet and energetic but not well trained. I was able to have a trainer work with him so he could be placed in a lovely former OES home.

Dash - found as a stray wondering a country road. He was covered in manure and fleas. The shelter was called and they took him in. He is a sweet, very quiet boy who is estimated at about one yr old. (I think he is older). He got a clean bill of health which permitted his placement in a wonderful OES family in NY who wanted to help an OES in need.

Colorado Rescue

Maddox, a 5-year-old neutered male, was surrendered because he nipped at a new boyfriend in the house. He now lives in Las Cruces, New Mexico.

Celtic, an 8-year-old neutered male, arrived at OES Rescue of Colorado when his owners realized they no longer had available quality time for him. He now lives in Parker, Colorado.

Finnian, a 5-year-old neutered male, was returned to OES Rescue of CO because his owners could not contribute the needed time for Finn's training needs.

Gumby spent her first 4-plus years in a "doodle-mix" puppy mill. She shared her adoptive family with another rescued OES, but, sadly after many months she became obsessed with the notion of being "the only dog" in the family. Over a year of professional training and finally a behaviorist's observation led to her family's realization each Sheepie required a non-violent, healthy lifestyle apart. Gumby resides as the only dog in an active family setting in Frederick, CO.

Southern California Rescue

4 year old **Waldo** was wandering in the high desert and the shelter picked him up. His new owners say he is trying to be an escape artist but obedience classes are helping him.

5 year old **Becky** was a stray from the San Diego area. She is a wonderful OES and her new home feels like she has been there forever.

6 year old **Garth** is the casualty of a divorce. His new family is adjusting to his size and thinks he is magnificent.

8 year old **Jasmine** was turned into the shelter by her owners. Low on thyroid and flea bitten, Jasmine went to a new family that was ready to help her get in shape and enjoy her life.

The family that turned in 7 year old **Oso** to rescue was moving. His new owner kept his name, Oso (Spanish for Bear) and tells us that he is very loving dog and plays fetch all the time.

8 year old **Teddy** was filmed by Animal Control as an abuse case but no one ever claimed him. He now lives with rescue OES Sugar and a rescued Giant Schnau-

These two 4 year boys were turned into rescue when the family lost their home and moved in with other family members. **Bartholomew** is the alpha and is now very happy as an only dog. **Dimitri** is coming out of his shell and playing all the time with his toys.

Carolinas Rescue

Boomer was found running loose with his leash attached. The person that found him searched for weeks before surrendering to rescue. We then continued the search for another month with no luck! He is certainly a very well mannered, obedient boy so, we feared some-thing happened to his owner. Wasn't long until Boomer was spotted by a lovely, experienced OES family in Canada! He is doing great and showing his new family how he wants things done.

Southwest Rescue

Heidi's owner passed away and she is an OTI by his grandson. She is a spayed, 8 ½ year old with arthritis in her hips. She was current on her vaccinations, but I had my vet do a CBC, including thyroid and heartworm and she is now micro-chipped. Heidi is on 50 mg of Rimadyl along with supplements of GCS & MSM. She is a sweet Velcro girl ready to go to the right home.

Lola is an owner-turn-in as her owner couldn't give her the normal attention she should have had. She is very needy of affection and wants to please. She is spayed, brought current on all vaccinations, microchipped, licensed, has gained needed weight and almost ready for her new furever home.

Chicago Rescue

Sassy is a lively 7 yr. "young" gal whose family had to give her up when the mother-in-law moved in. It was either Sassy AND the husband or just Sassy had to leave. She has nice manners and is a well adjusted girl who will find the right home quickly.

Midwest Rescue

Muffin's family decided to surrender her to rescue due to not having time to devote to her. But there was more to her story. Muffin was 5 1/2, incontinent and weighed 124 pounds. Her incontinence was destroying her owner's home and didn't fit an active family. To make matters worse, Muffin was seriously troubled with separation anxiety and has obsessive/compulsive behaviors. Midwest OES Rescue had Muffin tested for a UTI and low thyroid levels. All were fine. Our vet started

Muffin on Proin and her bladder problems have subsided. Starting her on the green bean diet with quality kibble and adding a daily walking regimen has already gotten her down to 116 lbs!. Muffin's perfect family showed up on Saturday. With four OES-worth of experience and having dealt with issues such as her before, they fell in love immediately and couldn't be happier with this diamond in the rough. Congratulations, Muffin!

A disastrous economy resulted in the loss of job and home for **Maddie's** surrendering owner, forcing her to make a difficult decision for her pets. Midwest OES Rescue volunteers traveled to Western Ohio to pick up Maddie and found her just as delightful as her owner said she would be. With MOESR, Maddie was spayed and treated for tapeworms in addition to updating vaccinations that were long overdue and getting an overall physical exam. Maddie was placed after recovering from surgery with a wonderful OES-experienced owner. Congratulations, Maddie!

Miles was purchased as a puppy by a young childless couple who soon decided to have a baby. All was fine until Miles grumbled at the child and he was immediately banished to the backyard full-time. The owner contacted us wanting to surrender Miles because the wife understood that this was no way for an Old English to live. The husband felt differently and refused to let him go. A year later he was surrendered to Rescue. He was a joy for his foster mom and great with other dogs. His new family had recently lost their OES so were thrilled to take Miles into their hearts and home. Now he's got a proper place indoors and is once again a cherished member of a loving family.
